PROFESSIONAL PROFILE

Fullstack Developer and DevOps Engineer with 17 months of experience building complete solutions from infrastructure to final product.

My differentiating factor:

- Real technical versatility: from cloud infrastructure to mobile development
- Focus on automation and measurable results (70-90% reductions in processes)
- Integrating AI into development workflows and customer products
- Consulting capabilities: translating business needs into scalable technical solutions

Work philosophy: Clean code, maintainable architectures, and secure deployment. I'm comfortable working across frontend, backend, DevOps, and AI, adapting quickly to any stack or business domain. I'm looking for roles where I can make a real technical impact and experience continuous growth.

MAIN STACK

Frontend

- HTML5, CSS3, JavaScript (ES6+), TypeScript
- CSS: TailwindCSS, Flexbox, CSS Grid, Sass, Bootstrap
- JavaScript: DOM, Fetch, AJAX, Axios, Chart.js, D3.js, jQuery, Webpack, Vite
- React: ReactJS, Redux, Context API, Router, Hooks, State Management, Props, Next.js, React Query, Styled Components
- Angular: Angular CLI, Angular Material, RxJS, Services, Forms, Routing, Pipes
- Vue.js: Components, Routing, State Management
- Mobile: SwiftUI, Firebase, CocoaPods (iOS Development)
- Responsive Design & UI/UX: Mobile First, Responsive Web Design, Accessibility

Backend

- Node.js: Express, Nodemon, JWT, Bcrypt, Mongoose, dotenv
- PHP: PHPUnit, Custom PrestaShop Development
- Python: Django, Flask, FastAPI, Celery, Pandas, NumPy, Matplotlib, SQLAlchemy, Requests, Pytest

- Java: Spring Boot, Spring Security, Spring Data JPA, Jakarta EE, JWT, Bcrypt, Maven, Hibernate, JUnit, Log4j
- .NET: ASP.NET Core, ASP.NET MVC
- Databases: MySQL, PostgreSQL, MariaDB, SQL, MongoDB, SQLite, Firebase Realtime DB, Firestore, Redis, Prisma ORM
- APIs: REST, JWT, Swagger/OpenAPI, External API Integrations

DevOps & Cloud

- Infrastructure as Code: Terraform (HCL), Reusable Modules, Multi-environment
- Google Cloud Platform (GCP): Cloud Run, Artifact Registry, Cloud Storage, Cloud Monitoring, Cloud Logging, IAM, Service Accounts
- Containers: Docker, Docker Compose
- CI/CD: GitHub Actions, GitLab CI, Full pipeline automation
- Cloudflare: Workers (Serverless), DNS Management, CDN, SSL/TLS
- Servers & Systems: Linux (Debian), Windows Server, Nginx, Apache, SSH, DNS, SSL/TLS
- Platforms: Vercel, AWS EC2, DigitalOcean
- Security: JWT, Bcrypt, SSL/TLS, Firewalls, IAM, Principle of least privilege

ERP & E-commerce

- Odoo 19: ERP Consulting, Custom Module Development, Python, XML, QWeb, OWL Framework
- Verifactu (AEAT): Integration with the Tax Agency, invoice validation, tax compliance
- PrestaShop 8/9: Custom module development, migrations, optimization

Complementary Tools

- Version control: Git, GitHub, GitLab
- IDEs & Editors: VS Code, IntelliJ, Eclipse, Xcode
- Testing: JUnit, PyTest, Postman
- CMS: WordPress, Joomla

OUTSTANDING EXPERIENCE

Fullstack Developer & DevOps Engineer – Databay Solutions

AUG 2025 – MAY 2026 (9 months) | Remote, Spain

1. DevOps Template - Terraform GCP (Infrastructure as Code)

- Technologies: Terraform, GCP (Cloud Run, Artifact Registry, Storage, Monitoring), Cloudflare Workers, Docker, GitHub Actions, CI/CD, HCL, YAML
- I designed and developed a reusable enterprise IaC template for automated full-stack application deployments on GCP
- Modular architecture with 6 Terraform modules: Artifact Registry, Cloud Run, Cloud Storage, Cloudflare DNS/Workers, IAM
- Complete CI/CD pipeline: 7 GitHub Actions workflows for build, deploy, validation, and change detection
- Multi-environment management (PR Preview, Staging, Production) with zero-downtime deployments
- 90% reduction in deployment time vs. manual process, used in 6 client projects

2. UTSCH Spain - Digital Tuition Platform

- Technologies: React, Vue.js, Prisma, PostgreSQL, Kount (security), DGT API, Terraform, GCP, Cloudflare
- URL: <https://utsch.es/>
- Complete full-stack development and deployment with our own DevOps infrastructure
- Critical integration with official DGT API for real-time license plate validations
- Kount anti-fraud system implemented for prevention and risk scoring in transactions

3. Cuboc - Business Management Platform

- Technologies: React, Next.js, Vue.js, Prisma, PostgreSQL, Kount, Open Graph, Vercel, Terraform, GCP
- URL: <https://cuboc-app.vercel.app/>
- Hybrid architecture: Custom DevOps (GCP + Terraform) for dev/staging, Vercel for production
- Automatic preview environments for each Pull Request for rapid testing

4. INDE-K - Internal Business Management API

- Technologies: Node.js/Express, Python/FastAPI, PostgreSQL, Redis, Pandas, Terraform, GCP, Cloud Run
- Internal REST API for processing enterprise data, similar to 'Excel as a Service'
- Asynchronous processing with queuing system for large files
- Redis implemented for heavy operation caching and performance optimization

5. Tourism With Style - Odoo ERP Implementation

- Technologies: Odoo 19, Python, PostgreSQL, XML, QWeb, JavaScript, OWL Framework, Verifactu AEAT
- Client: <https://www.tourismwithstyle.com/>
- Complete ERP implementation including business consulting, development and training
- Development of 6 custom modules: Sales, Purchases, CRM, Suppliers, Inventory, Accounting
- Verifactu (AEAT) integration: Invoice validation, verification codes, automatic submission to the Tax Agency
- Commission system, customized workflows, integration with third-party APIs
- 80% reduction in time spent on manual administrative processes

6. Russells - Marketplace for Meals and Snacks

- Technologies: Odoo 19, Python, PostgreSQL, XML, QWeb, JavaScript, OWL Framework
- Client: <https://www.russells.es/>
- Multi-vendor ERP marketplace with complete custom module development
- Marketplace logic: Automated commission system, seller dashboard, autonomous catalog management
- Multi-vendor order flow with automatic splitting and independent tracking
- 70% reduction in marketplace administrative management time

7. IEditorial - PrestaShop Migration and Development

- Technologies: PrestaShop 8, PHP, MySQL, JavaScript, API REST, Cron Jobs, Docker, Nginx
- URL: <https://nuevo.iceditorial.com/>
- Complete migration of online store from legacy version to PrestaShop 8
- Development of 2 custom modules: (1) Synchronization of orders via API to external database in real time, (2) Optimized synchronization of products with batch processing
- Complete solution to the problem of native PrestaShop cron job limitations for large catalogs

Fullstack Developer – ControlNet S.L.

SEP 2023 – JAN 2024 (4 months) | Jerez de la Frontera, Cádiz

- Bafre iOS: I led the complete migration of a real estate app from UIKit (10-year-old legacy code) to modern SwiftUI in just 2 months. Stack: SwiftUI, Firebase, CocoaPods, Git, CI/CD. App deployed to production on the App Store.
- App Store URL: <https://apps.apple.com/app/bafre-inmobiliaria/id6496130033>
- CRM ASP.NET: I resolved critical security and logic issues in a production CRM. This included optimizing SQL queries, improving performance, and fixing authentication bugs.
- La11Mil (WordPress): Comprehensive malware analysis and cleaning, security hardening through updates and plugins, performance optimization, visual redesign according to client requests.
- URL: <https://la11mil.es/>
- Temporary Angular frontend support for the company's internal sales platform

Full-Stack Developer– IES Castillo de Luna (Work Placement)

February 2024 – June 2024 (4 months) | Rota, Cádiz

- Complete development of a full-stack web application for educational management. Implementation of MVC architecture, security (JWT, Bcrypt), database optimization, and configuration and hardening of an Nginx server with SSL/TLS.

EDUCATION

Advanced Technician in Web Application Development (DAW)

IES Rafael Alberti and IES Francisco Romero Vargas

SEP 2021 – DEC 2023 | Cádiz & Jerez de la Frontera

Technician in Microcomputer Systems and Networks

IES Castillo de Luna

SEP 2018 – JUL 2020 | Rota, Cádiz | CCNA 1 & 2 Certifications

FEATURED PROJECTS

BookingAPI – RESTful Hotel API

- Technologies: Spring Boot, JWT, Swagger, Spring Security, Spring Data JPA
- Complete management of users, roles, reservations, rooms, reviews and payments
- Unit tests with JUnit

 <https://github.com/Lucash00/Bookingapi.git>

MoviesDetails – Movie Catalog

- Technologies: React, JavaScript, TMDb API
- Self-developed movie catalog application with trailers, synopses and cast

 <https://3a32f515.moviesdetails-react.pages.dev/>

 <https://github.com/Lucash00/MoviesDetails> React.git

RotaPlace – Marketplace (DAW Final Project)

- Technologies: PHP, MySQL, JavaScript, Nginx, SSL/TLS, Linux Debian, DNS
- Complete e-commerce marketplace with user management, products, shopping cart, and orders

- Complete Nginx server setup from scratch with SSL, optimization, security, and backups
